## FRAGMENTATION OF SPACE

Fragmentation whether voids in the inner city or disparate fields of objects which blur the periphery of cities is evidence of a contemporary and fundamental shift in our technological, perceptual and experiential constructs

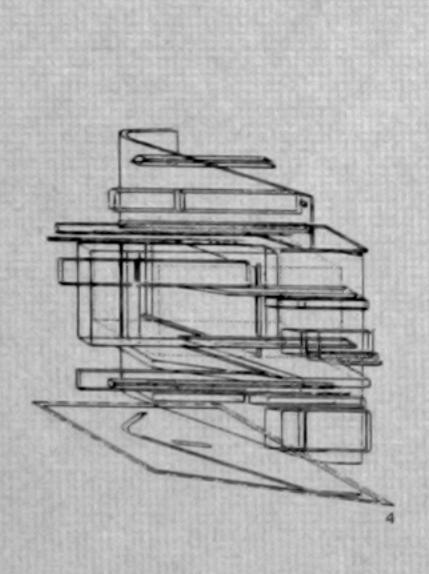

Since Benjamin's analysis, cinematic perception can be seen as bringing into question the authenticity of objects; since Virillio's analysis, transparence must be understood as the prevalent computer/communication induced mode of perception. It is now less and less possible to use the model of coherence to understand our fragmented, simulated and transparent spaces.

As perspectival perception became inscribed in the focused plans of cities, so today's voids which refuse codification can be read as positive manifestations of a revolution of perception indistinguishable from the modes of the post industrial technology. In such new fields the status of architecture must be revised.

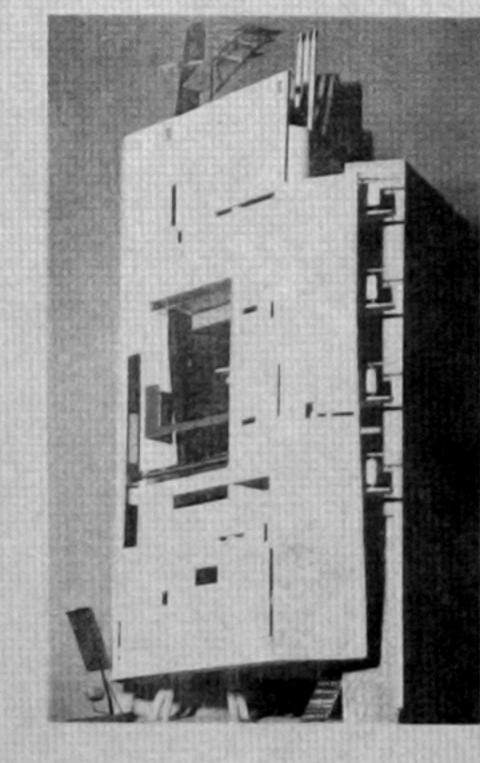

Our work has been researching these fields through the medium of the project, always avoiding what Lyotard calls the "grand narratives of theoretical causality which have today been replaced by the small narratives of practical opportunity." For the New City Library in Münster the plan reflects a profound change in the status of the storehouse of knowledge. Micro-fische and compter catalogs render information invisible, their "space" and their "access" is different to that of the book on the shelf. The divided plan of the Munster Library reflects this new situation, on one side are found "books," on the other "pure information." This cut becomes a street through the center of the library, a breaking down of the classical hierarchy of public space, facade, interior.

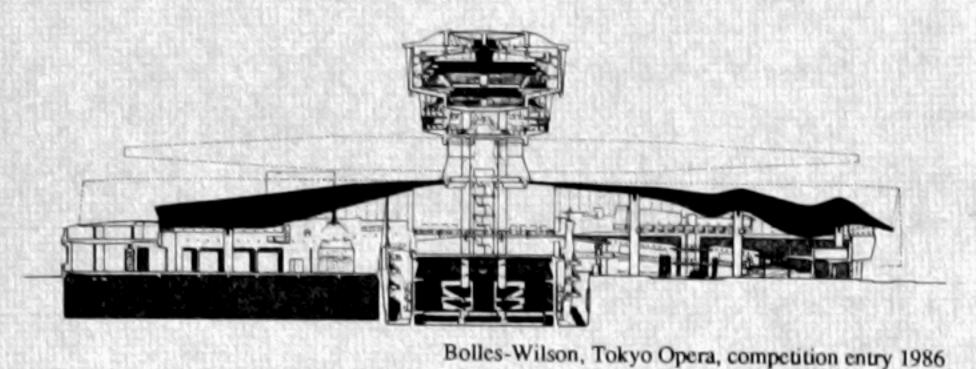

While insisting on its modernity the Münster Library also respects the medieval plan of the city. But as the plan is a reconstruction, so this new insertion is ultimately and necessarily an unfamiliar animal, at once at home and alien to its context.

-- Peter L. Wilson

Bolles-Wilson, Cosmos Street Office Building, Tokyo, 1989

Comments re: the City Library Competition, Münster

Being the words of an old trooper, for whom the term "library" sets off certain well-worn mental circuitries: What is a library in the age of electronic information? Can it be located in one centralized building any more? (Sweet memories of a onetime crush on Marshall McLuhan.)

These questions must have been first asked at least twenty-five years ago, but perhaps only Cedric Price among us answered them nonstereotypically--in a way he would have considered obvious -- a good nuts and bolts project, to our dear Cedric.

Peter Wilson, on the other hand, is responding in his own way, and that of his generation of architects fully accepting the program as developed by the worthy Burghers of Münster. Okay--so you either enter a competition to win, or to make a

Having got that out of the way, the building itself is a very exciting melange of forms. The copper-clad wall, with its underparts removed to reveal the interior space gives one that same naughty feeling as when motoring behind a car whose body has been raised, exposing leaf springs, shocks, and differential.

It's the work of a young man in the process of discovering his own way, still with a nod in the direction of those who have influenced him; but there's a sense of power and confidence here, and of the ability to compose a dramatic spatial sequence. But please, Peter, use a bit of distortion in the perspective of the "main axis"---it would reveal the drama of the large curved wall's prow.

-Michael Webb

## DISCUSSION PROGRAM

TOWARDS IMHOTEP Against and Beyond De-Construction Moderator: Ion February 27, 1990 7pm

Native American Art in Public: Where Does it Fit? Moderator: Lloyd E. Oxendine March 6, 1990 7pm

Lloyd E. Oxendine, Liberty

What can native American artists and art (process, context, objects) contribute to the larger evolution or art in public?

Background: How can one generalize about native American culture considering the number and diversity of cultures? (Maybe it is not so important to be comprehensive, in the end.)

What might be a definition of "public" or "private" for a native American?

Can we assume that the primary contrast between rural/traditional and urban/ "progressive" applies equally to both societies?

Are there native American concepts of space, the land, civic organization, private property, the unity of beings, trade, ancestors, and the afterlife which have relevance to art in public?

As a means of communication, Indian to Indian, how does or can art differ from schools, religious gatherings, and other cultural exchange?

Lloyd Oxendine is an artist and Director of the American Community House Art Gallery in New York City.

Introduction of The Artangel Trust Moderator: John Carson March 8, 1990 7pm

In August 1986 enthralled gatherings in London witnessed the intriguing phenomenon of HOUSEWATCH. Six artists pre-

The Artangel Trust, based in London, is a funding and initiating organization for the visual arts.

-presenting art in public locations

-collaborationg with artists and curators to win new audiences beyond the museum -encouraging artists working in a context of social or political intervention -supporting public works which are transient, temporary or not gallery based

Public Space in a Private Time Moderator: Vito Acconci March 13, 1990 7pm

## Request for Proposals

Spring Exhibition: In an effort to show new and emerging work, STOREFRONT is making a Request For Proposals from curators, artists, and architects. If you are interested and would like to propose an exhibition, project, forum or other events, please send a description of your proposal and no more than 20 slides of your work. The due date for this RFP will be March 10, 1990.

## PROJECT ATLAS

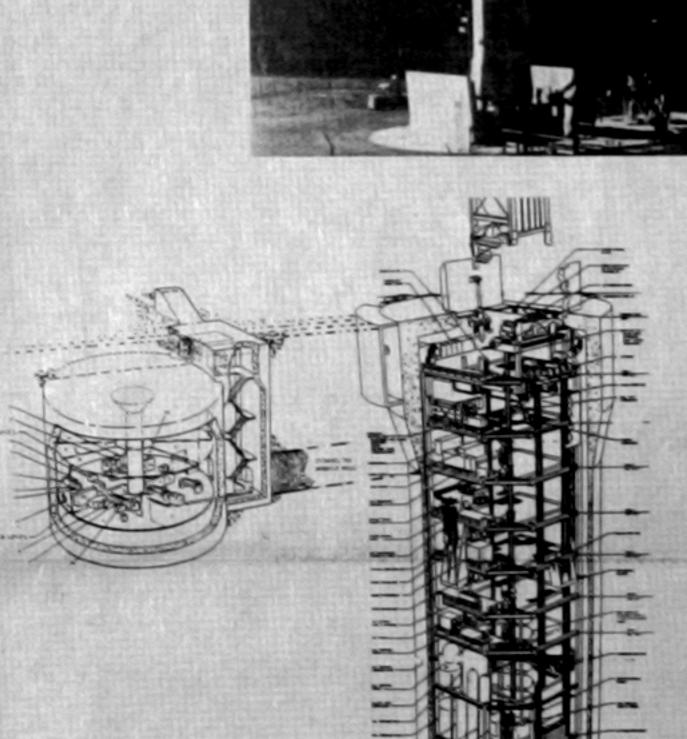

Project Atlas is an international competition organized by STOREFRONT FOR ART AND ARCHITECTURE, open to the participation of individual artists, architects and groups of interested people in any field. Twelve obsolete and abandoned Atlas missile bases remain in the region surrounding Plattsburg Air Force base, at the edge of Lake Champlain and the Adirondack Mountains, in New York State. The bases were designed to house the Atlas system, the first of a series of American InterContinental Ballistic Missile weapons, capable of delivering a nuclear warhead at a distance of approximately 6000 miles. The bases were operational for only 30 months, from 1962, when they were completed, to 1965 when there were deactivated in favor of a more advanced missile system. Each underground site consists of a steel and concrete silo 174 feet deep and 52 feet in diameter, connected through an access tunnel to a circular, two-story, subterranean control center.

In the bucolic landscape, the sites seem to have been left by an alien civilization. They are monuments to our age, projecting comparable mystery to works such as Stonehenge and the great Pyramids. In their present uselessness, they are singular remnants of human faith in the advancement of progress and technology. The same Atlas rocket put the first American in space, John Glenn; A technological paradigm of the first degree. Concurrenty, with its speed and long-range capability, the Atlas ICBM became the first true instrument of global war. This required extremely complex guidance and electronic communication systems. The missile guidance systems perceive and coordinate to the Earth's magnetic field, rotation and the location of sun, moon and stars. This high speed transmission and elaboration of information involved a global network that quickly reduced our planetary conception to the true Global Village.

Project Atlas is a competition seeking to go beyond the creation of innovative designs for new and public uses of the abandoned Atlas missile bases in the North East. If today the arms race seems to have reversed its course, aiming towards disarmament, the 12 abandoned bases serve as metaphor for future issues. Are the silos mouments to a time we have left behind, or will they remain precursors to an empty world. How can communities whose main support comes from the military industrial complex survive in times of de-militarization? The intent of Project Atlas is to interpret the contradictions and enigmas of our age, at the beginning of a new decade and on the threshold of a new millenium: like a mirror, the project aims to reflect and reverse a reality. The project touches some of the most crucial issues in regard to our culture, industrialization and modernism, spcifically challenging the formalistic truth and universal beauty embedded in pure forms and functions.

Project Atlas is both an action in the present about the transition of time from the past to the future and a present subject for the transformation of culture from the past to the future. It is time now to acknowledge that this century is over and the past can only be of service for a critical re-examination of how culture has transformed as a direct result of technology. The forum for this re-examination in the case of Project Atlas is in the specific realm of art and architecture. The subject of this project, the Atlas Missile bases, is of our past and should be properly utilized as an instrument to gain critical review of our cultural past. Thereby this project, as present endeavor, is a transitional effort toward a cultural projection into our future, immediately toward the next century and patiently toward the next millennium, through an attempt to transform a cultrual emblem of or past into a prediction about our future by a simultaneous act of critical review and creative proposition.

We welcome any proposition and/or ideas in the form of drawings, models, text, concepts or actions. Deadline for entries will be June 15, 1990. The proposals selected by an international jury will be exhibited at STOREFRONT, in New York City, September 13 - October 13, 1990. Media and presentation requirements will be open: two dimensional work should be no larger than 6 square feet and three dimensional work should limit volume to 1 cubic foot. An entry fee of \$10 will be required by June 1, 1990 for each proposal submitted. Selected entries, texts and Jurors' comments will be published in a catalog to be issued in concurrence with the STOREFRONT exhibition. Entrants will receive a copy of the catalog.
